# Subham Kumar Panda

Bhubaneswar | +91-8984068054 | subhampersonal123@gmail.com | linkedin.com/in/subhamkumarpanda | github.com/soberrex

## Summary

Python and GenAI developer who has shipped production features on a live multi-tenant SaaS platform and an LLM WhatsApp guest-support bot, covering RAG, guardrailed agent workflows, REST APIs, PostgreSQL and S3-compatible object storage.

## Technical Skills

**Machine Learning:** Python, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, SHAP, Jupyter / Colab.
**NLP & GenAI:** HuggingFace, LLM APIs, Prompt Engineering, RAG, LangChain, LangGraph, ChromaDB.
**Engineering:** FastAPI, Flask, REST APIs, SQL (PostgreSQL), MongoDB, Docker, Git, GitHub Actions.
**Cloud & AI Tools:** Vertex AI, Linode Object Storage (S3), Claude Code, MCP.

## Experience

**Python Developer Intern** **May 2026 – August 2026**
*Aviara Tech, DLF Cybercity, Bhubaneswar* *Internship Certificate* | *SLAFPL Achievement Certificate*

**AI Guest-Support Chatbot (WhatsApp)** | *Python, FastAPI, Claude API, PostgreSQL, MongoDB*

- Designed the service-request intake and human-handoff flow: the bot collects details one question at a time, confirms a summary with the guest, then assigns the chat to the guest-relations team and pauses itself.
- Added no-hallucination guardrails (never quotes prices or invents services) and validated bot behavior with a DB-free test harness; shipped dark behind a feature flag with a PostgreSQL schema and rollback runbook.

**ScaleOps, Multi-Tenant B2B Operations SaaS** | *TypeScript, Next.js, PostgreSQL, Linode Object Storage*

- Owned the client-to-bucket upload pipeline (84 commits): moved files from base64 PostgreSQL rows to Linode Object Storage (S3-compatible) so the database stores only file references, cutting storage cost.
- Made uploads outage-tolerant (circuit breaker, auto-draining outbox, read-through cache) and secured delivery with permission-checked file access, a shared upload validator and signed URLs; set up dev, prod and backup buckets.

**AI/ML Developer Intern** **August 2024 – October 2024**
*Acmegrade (Remote)* *Python, Flask, REST APIs*

- Built a Flask REST API for real-time model inference, with error handling and tests for reliable predictions.

## Projects

**Emotion Classification Pipeline** | *RoBERTa, HuggingFace Transformers, SHAP, Google Colab*

- Built an end-to-end training and evaluation pipeline: fine-tuned RoBERTa-base with Monte Carlo Dropout, ran a 5-model ablation study, and used SHAP and error analysis.

**DocuChat AI** | *FastAPI, PostgreSQL, LlamaIndex, ChromaDB, React* **January 2025**

- Deployed a full-stack RAG app that parses PDF, TXT and DOCX files and answers questions through vector search.

**Autonomous Data & Reporting Agent** | *Python, LangGraph, DuckDB, sqlglot* **Ongoing**

- LangGraph agent turning business questions into DuckDB SQL, with a critic loop that checks the generated SQL and sqlglot guardrails allowing only read-only, row-limited SELECTs.

**BERT Intent Classification Chatbot** | *BERT, HuggingFace, FastAPI, Streamlit, Redis*

- Trained BERT on Banking77 and CLINC150 (227 intents); served via FastAPI with Redis; hosted on Hugging Face.

## Education

**MCA**, Silicon University (Expected 2027) | **B.Sc. Computer Science**, Rajdhani College (2025)

## Certifications

Google Cloud Skills Boost (Vertex AI, Diamond League) | IBM Artificial Intelligence Fundamentals
